Sustainability for a life together

STEFAN KNOPP'S PIECES BRING THE POWER OF NATURE INTO YOUR HOME

Wood – a material grown through sunlight, treated with extraordinary methods. Stefan Knopp's pieces are made to last across generations. A very special enterprise and its philosophy...

Stefan Knopp doesn't just create pieces from wood, he coaxes secrets out of the trees. Every single growth spurt and every change in the climate have left their mark on the wood. These special characteristics are what Stefan Knopp is especially interested in. He roots out the individual stories of the various pieces of wood and makes them visible with his craftsmanship and specially developed methods.

He believes that trees have a soul. His works reflect his deep relationship with nature and his respect for the formidable age of the trees he uses. He gives them a new lease on life – as a table, for instance. Created with passion, made to last across generations...

THE TABLE

as the hub of life

Stefan Knopp sees the dining table as the heart of human interactions. This is where people communicate and work, eat and socialise. This is where relationships are celebrated – both in daily life and on special occasions.

Stefan Knopp only works with Austrian woods such as oak and ash. He uses fire and water to make them durable. This treatment gives the surfaces their extraordinary beauty.

ELEGANT

Sustainability

Meeting customers face to face is very important to Stefan Knopp, as the personal impression flows into the design. This results in truly unique pieces whose timeless beauty defies trends and fads. These extraordinary objects have structure – with rough edges and peculiarities, just like people. In the celebration of these “imperfections” lies true perfection.

Because they are so durable, Knopp’s pieces stay in families for many decades. Stefan Knopp wants his pieces to evoke emotions in the people that look at and touch them. But more than that: he wants people to reflect on the essence of nature. If that happens, Stefan Knopp has accomplished his mission.
